

Enterprise Integration Quick Start

Powerful multi-cloud API services connecting your entire business

Organizations often run complex IT landscapes with multiple systems, applications, and data sources. Effective enterprise integration is crucial to ensure seamless communication and data flow across the organization. This involves integrating various systems, APIs, and data sources to enable real-time information sharing, process automation, and improved collaboration.

One of the most common issues is cost - integrating multiple systems and software solutions can be expensive, and businesses need to consider the upfront costs as well as any ongoing maintenance required. With a lack of standard protocols and increasing need for data security, organizations need to ensure that customer data remains secure throughout the entire process.

Enterprise Integration, delivered by Argano, enables a full end-to-end API solution that provides seamless integration and improved scalability to help your business operate more efficiently, improve data access, and reduce cost, while keeping your technology environment secure and compliant.

Key Benefits:

- **Seamless Integration:** Integrate your systems, applications, and data sources seamlessly to increase operational efficiency
- **Data Access:** Access critical data from multiple sources, enabling better decision-making, analytics, and reporting capabilities
- **Improved Scalability:** Leverage a well-designed end-to-end API solution that can accommodate the growth and changing needs of your business
- **Competitive Advantage:** Gain the ability to respond more quickly to market demand with robust and flexible integrations
- **Optimized Costs:** Identifying redundant or underutilized technology/processes to reduce costs and allocate resources more effectively
- **Enhanced Security and Compliance:** Keep your systems secure while ensuring compliance with industry regulations and data protection laws

"Argano has been a great partner for our data and integration needs. Whenever we have needed help with our key initiatives, Argano has responded to our needs in a timely manner and with high quality work. [...]"

Sam Catoe, Director of Delivery and Demand Management

Strategic Alliances

Enterprise Integration Quick Start Overview

Connect with an Argano expert to get your integration journey started

- Identify current pain points
- Review current platforms
- Establish project goals and scope

- Analyze existing processes and technologies
- Perform cost-benefit analysis
- Prioritize tasks based on business goals

- Develop detailed roadmap with milestones
- Define technical architecture
- Design and implement solution

Project Options

	Limited: 10 Days of development + 2 Days of Managed Services Our limited package is a compact solution contains simple 1-1 transformations with data fields coming from a single destination, up to 5 endpoints.	Standard: 20 days of development + 4 days of Managed Services Our standard package offers a balanced interface containing one to two sources of data with multiple field mappings combined with medium-size transformations. The two to four destination systems will have.	Enterprise: 25 days of development + 8 days of Managed Services Our enterprise package is a comprehensive solution with a large interface that contains complex data mappings and transformations with several destination systems with more than 60 data fields. The destination systems will have their own data mapping and formats with up to 15 endpoints.
Single source data model	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Implementation of 5 endpoints	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
1:1 data transfer	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Single enterprise application	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Multiple source API design		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Multi-resource data model - up to 60 fields		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Implementation of 10 endpoints		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Two enterprise applications		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Destination data mapping			<input checked="" type="checkbox"/>
Destination data formatting			<input checked="" type="checkbox"/>
Implementation of 15 endpoints			<input checked="" type="checkbox"/>

About Argano

Argano is the first of its kind: a digital consultancy totally immersed in high-performance operations. We steward enterprises through ever-evolving markets, empowering them with transformative strategies and technologies to exceed customer expectations, unlock commercial innovation, and drive growth.
