Digital Foundations™ Day *Live* – Chicago

Keynote Session and Event Overview

3:30 Check-In	4:00 Keynote Cloud Transformation with ODL, Inc.	4:45 Three Breakouts to Pick From ODL, Inc. Deep Dive | EPM | HCM	5:45 Wrigley Rooftops

Join us at Digital Foundations Days Live and connect with your local community of industry peers for an event about cloud transformation, starting with a keynote featuring ODL, Inc., a leading building products company founded in 1945. There will then be three breakout sessions to choose between, followed by a Cubs game from Wrigley Rooftops!

Adam Skinner, Vice President of Supply Chain at ODL, will highlight how the company is revolutionizing its business with cloud applications, including Oracle Cloud ERP, SCM, EPM, and CX, with orders placed with CPQ flowing through to ERP and SCM for manufacturing. Learn from Adam about:

- Challenges faced by ODL with their prior on-premises products used.
- Decisions made about their path forward, first around applications and then deployment.
- Go-live experiences and lessons learned.

The discussion will be followed by concurrent breakout sessions so you can select which of the three are most applicable to you: An EPM breakout on excellence in the office of finance, an HCM breakout on mastering AI in human resources, or a deep dive with ODL into their move from on-premises to the cloud for ERP, SCM, EPM, and CX.

After this, everyone who can make it will head across the street to Wrigley Rooftops to enjoy the Cubs game. We look forward to seeing you there!

Digital Foundations™ Day *Live* – Chicago

ODL, Inc. Deep Dive Breakout Session

| 3:30 Check-In | 4:00 Keynote
Cloud Transformation with ODL, Inc. | 4:45 Three Breakouts to Pick From
ODL, Inc. Deep Dive | EPM | HCM | 5:45 Wrigley Rooftops |

Deep Dive with ODL on Moving from On-Premises to Cloud Applications

In this session, ODL and Argano will cover in greater detail the ODL move from on-premises applications to Oracle Cloud ERP, SCM, EPM, and CX. Some of the topics to be covered include:

- What led to the ODL decision on cloud transformation.
- What was the business justification for a major technology shift.
- What steps were taken to prepare, what went well, and what could have gone better.
- What other companies considering a cloud transformation should think about.

Argano will also cover some of the tools that can be used to first evaluate a potential move to the cloud — either a transformational or hybrid move — and then to streamline and simplify your journey.

This session will be a great deep dive into the ODL experience, with insights to help you wherever your business is in relation to the cloud.

Digital Foundations™ Day *Live* – Chicago

EPM Breakout Session

| 3:30 Check-In | 4:00 Keynote
Cloud Transformation with ODL, Inc. | 4:45 Three Breakouts to Pick From
ODL, Inc. Deep Dive \| EPM \| HCM | 5:45 Wrigley Rooftops |

Achieving the Art of the Possible with a Fully Integrated EPM Suite

Join us as we detail a day in the life of a finance executive equipped with a modern and fully integrated enterprise performance management platform.

Argano has crafted a custom and immersive experience that offers a glimpse into daily operations in the office of finance and showcases Oracle Cloud EPM's distinguishing and differentiating features — all geared towards expediting decision-making processes, from the CFO down through the organization.

We kick off this persona-led demonstration by leveraging AI / IPM Insights to view daily anomalies and address those using the tools within the platform. You will learn technologies and best practices available in Cloud EPM, such as driver-based trending and pattern-based planning to create different scenarios for forecasts to analyze the impact on cash flow. We also dive into the allocations process and show the ability to allocate shared costs to different areas of the business, manage acquisitions, and utilize modeling capabilities with different consolidation cases driven by Insights.

This informative and relaxed session with your peers will provide a look at what can be accomplished with a modern cloud application for enterprise performance management!

3:30 Check-In	4:00 Keynote Cloud Transformation with ODL, Inc.	4:45 Three Breakouts to Pick From ODL, Inc. Deep Dive | EPM | HCM	5:45 Wrigley Rooftops

Top of Mind for HR Leaders: Mastering AI in Human Resources

HR leaders are emphasizing the critical role of Artificial Intelligence (AI) in strategic Human Capital Management (HCM) initiatives. Join Irfan Khan, Managing Director Technology Strategy at Oracle and Chris Maurio, VP HCM Presales at Argano to learn how Oracle Cloud HCM's advanced AI technologies are revolutionizing HR operations, significantly enhancing efficiency and transforming task execution.

The integration of AI, particularly Generative AI, into HR workflows not only accelerates routine tasks but also liberates resources for strategic, high-value activities. Generative AI can drastically reduce the time required for routine tasks, allowing organizations to reallocate resources to more complex, strategic endeavors. Some of the things we will cover in this session include the following:

- Background on AI, specifically Generative AI
- How AI can impact productivity in HR
- Challenges to be aware of around using AI
- How to get started with AI within Oracle Cloud HCM

You will learn how Oracle Cloud HCM's built-in AI capabilities — and Argano's implementation methodology — can amplify HR's strategic impact. We look forward to having you join us for this informative session with your peers about mastering AI in human resources!
